

Academy for Lifelong Learning *An Invitation for Adults—seasoned to 50 years or more*

Hi Honey:

What a wealth of timely, informative, significant and edifying information was delivered to an attentive audience of speakers and guests Saturday morning, March 4th!

We refer, of course, to the Houston Community College Academy of Lifelong Learning's first seminar on March 4th. Your topic, "Long Term Care Insurance" that you presented, was a vital part of the program and provided much new information to all present. The entire staff of **ALL** wants to express our sincere gratitude to you for your part in the program. We were amazed at the plethora of old, new, and projected information that you possessed and the clear manner in which it was delivered. Your presentation techniques would have made 20 year olds want to retire!

The prevailing opinion of attendees was that we should have a repeat of this program in 4-6 months as the material presented was so significant. The need for this type of seminar is unique in that the majority of the attendees were not aware of all the ramifications of the many types of information that is required to enable the new retiree to successfully achieve his "golden years".

We **ALL** thank you for the excellence that was exhibited in your presentation. We will remain in touch.

Cordially,

Phil Godshalk
